

EPA-Approved Products Proven To Kill The COVID-19 Virus

The CDC states that the primary and most important mode of transmission for COVID-19 is through close contact from person-to-person. Based on data from lab studies on COVID-19 and what is know about similar respiratory diseases, it may be possible that a person can get COVID-19 by touching a surface or object that has the virus on it and then touching their own mouth, nose, or possibly their eyes, but this isn't thought to be the main way the virus spreads.

Best practices to minimize the possibility of transmission is to sanitized all surfaces, especially frequently touched surfaces as often with a sanitizer that kills the SARS-CoV-2 virus that causes COVID-19.

The U.S. Environmental Protection Agency (EPA) has added to its list of products that have proven effective in killing the new coronavirus (SARS-CoV-2) on hard surfaces, based on results from laboratory testing. This update brings the total number of products approved by the EPA for use against SARS-CoV-2 virus to 23 products.

1. Lysol Disinfectant Spray
2. Lysol Disinfectant Max Cover Mist
3. Lysol Disinfecting Wipes (all scents)
4. Lysol Laundry Sanitizer
5. Lonza Formulation R-82
6. Lonza Formulation S-21
7. Lonzagard RCS-256 Plus
8. Lonzagard RCS-128 PLUS
9. Lonzagard RCS-128
10. Lonzagard RCS-256
11. Lonza Formulation R-82F
12. Lonzagard R-82G
13. Lonza Formulation S-18
14. Lonza Formulation DC-103
15. Lonza Formulation S-21F
16. Lonza Formulation S-18F
17. Lonza Disinfectant Wipes
18. Lonza Nugen Low Streak Disinfectant Wipes
19. Lonza Disinfectant Wipes Plus
20. Lonza Disinfectant Wipes Plus 2
21. Clorox Commercial Solutions Disinfecting Wipes
22. Clorox Disinfecting Wipes
23. CDW (from The Clorox Company)

Unique HomeCare Services is headquartered in Norwood, Massachusetts and serves the surrounding communities with a full range of in-home care services.
